DNP Organizational Update

The only thing constant is change. The DNP Inc. organization is poised to make changes and keeps etching toward these changes every month. Refining the listing of site members, mailing list recipients, and those that we contact quarterly to invite to opt-in for more information is an on-going process. Keeping this mailing list clean and accurate is a part of business.

If your mailing information is not accurate (your name, title, credentials, company, or address) please [***LET US KNOW***](#). We are happy to change this information and appreciate you for helping to update your contact information.

Other projects and initiatives that are a part of the DNP Inc. organization include the on-going development of this monthly newsletter, OUTCOMES. It is evolving to include more articles of interest, links to important information to support and enhance to professional growth of the doctoral prepared nurse, and notices of past, present, and future events to support our collective community.

Many articles are submitted by students and graduates to share a point of view or insights that are valuable to all involved. Please share your insights by submitting your article for this newsletter. We value the opportunity to share experiences and insights to help those interested in doctoral nursing education grow and evolve.

As we build the site, we notice that most organizations are scheduling face-to-face conferences soon (at least through 2023). Doctors of Nursing Practice, Inc. has had a couple of financially troubling years, and has made the plan to make 2023 a year of virtual meetings. If they go well, we will develop and present a two-day virtual conference on **August 10 and 11, 2023**. Save these dates!

We know that virtual conferences are not as desirable as face-to-face conferences, yet the increased cost of venues, food and beverage, and Audio-Visual support would bring the price of such events to a level that is cost prohibitive. We will continue working on these plans to meet the vision and mission of DNP Inc.: to improve healthcare outcomes by promoting and enhancing the doctoral-prepared nursing professional.

Two other initiatives are still in the planning stages. Thank you to those that have submitted their willingness to be a part of the **Academy of Doctoral Prepared Nurses** and the **Journal of the Academy of Doctoral Prepared Nurses**. Both entities are in development. A meeting will be scheduled in early to mid-December to discuss and explore our opportunities with these ventures.

Read more about these plans in dedicated column in this and future issues of the OUTCOMES newsletter.

The mission of Doctors of Nursing Practice, Inc. is to improve healthcare outcomes by promoting and enhancing the doctoral prepared nursing professional. This mission requires a multifaceted approach to include a robust communication system (the DNP Inc. Website); an online community with forums, blogs, groups, and events; a listing of all known DNP programs; a repository of DNP projects; dissemination team to support DNP colleagues to share their work; continuing education; a foundation to support DNP growth; job listings; OUTCOMES monthly electronic newsletter; and, the annual national DNP Conferences.

Monthly DNP Inc. Survey Results

Last month's survey solicited responses regarding collaboration practices both intra and inter professional. Your thoughts are appreciated. Please see responses below. What do you think? Do these results reflect your point of view?

Question 1: Regarding memberships to professional organizations, please share your thoughts and observations. I am currently a member of two or more professional nursing organizations.

96% very much to absolutely, 4% somewhat to not at all

Question 2: These professional organizations afford me the opportunity to enhance my doctoral-prepared professional practice.

55% very much to absolutely, 45% somewhat to not at all

Question 3: The professional nursing organizations that I have joined have a limited scope to support my current terminal-degreed practice needs.

13% very much to absolutely, 87% somewhat to not at all

Question 4: The professional nursing organizations that I subscribe offer the opportunity to collaborate with a diverse variety of nursing professionals to achieve common goals.

65% very much to absolutely, 35% somewhat to not at all

Question 5: An organization that focuses on collaborative practice of doctoral prepared colleagues, regardless of respective degrees and backgrounds, is something that interests me. I would consider joining such an organization.

73% very much to absolutely, 27% somewhat to not at all

These quick-and-easy surveys help check the pulse and temperament of respondents. The surveys support a general understanding and appreciation of topics being discussed and examined. Please consider completing each month's survey to help reflect ourselves and our practice as DNP prepared nursing colleagues.

Dissemination Team / Featured Repository Projects

The Dissemination Team is a collective effort to support DNP student and graduate colleagues in sharing their completed DNP projects. Many programs archive completed projects in a university archive, while others save the work to searchable databases that can be viewed by those with access to these library-based collections. The DNP Project Repository is different. It is searchable by all browsers and search engines, and can be shared with stakeholders. The content is the intellectual property of the author. **University programs that are a part of the Dissemination Team support their students and graduates by providing a \$5 discount for all repository uploads from their school.**

Programs that are a part of the Dissemination Team include:

<u>Chaminade University of Honolulu</u>	<u>Saint Louis University</u>
<u>Charles R. Drew University</u>	<u>Sentinel University</u>
<u>Lourdes University</u>	<u>University of Maryland</u>
<u>Purdue University Global</u>	<u>Wilmington University</u>
<u>Sacred Heart University</u>	
Your alma mater should be listed also!	Click <u>HERE</u> for more information.

DNP Repository Featured Scholars

The skills and dedication of DNP prepared colleagues can be seen in the work posted to the repository – a curated collection of articles. Here’s a sample of what can be found in the **[DNP Doctoral Project Repository](#)**:

[Developing an Evidence-Based Protocol for Managing Outpatient Pediatric Asthma](#) by Keshavan Kodandapani, DNP, DNP-BC from Touro University Nevada

[A Need for Support after Drug and Alcohol Treatment](#) by Deborah Ann Koopman, DNP, FNP from Bradley University

[Creating Pathways of Care: A Multidisciplinary Approach to Increasing Screening and Treatment of Postpartum Depression within a Rural Health Clinic](#) by Holly T. Kralj, DNP, CNP, IBCLC, PHN from the University of Hawaii Manoa

[Development and Evaluation of a Nurse Anesthetist Directed Dexmedetomidine Protocol for Patients Undergoing Laparoscopic Cholecystectomy in an Academic Medical Center](#) by Mark K. Krammes, DNP, MSN, MHA, CRNA, NEA-BC from Wilmington University

The Doctoral Project Repository is an archive of curated documents. This archive does not replace or presume any publication effort. Each listing is owned by the individual that uploads the completed academic scholarly practice project. This service allows you to share ideas and work products into both the scholarly and consumer communities.

For more information about the Doctoral Project Repository including methods to upload your information please visit **[THIS PAGE](#).**

Equipping DNP Students Through Mentorship

Since the inception of the DNP role in 2006, there has been much growth in the profession. According to current DNP program statistics by the American Association of Colleges of Nursing (AACN), in 2021, there were 407 DNP programs with 40,834 students enrolled in DNP programs. As these students engage in their DNP Program and transition into their new roles, it is important to consider how those already in practice can aid in equipping DNP students for program success.

The concept of mentorship involves the pairing of the novice (student) nurse with an experienced professional (faculty or DNP mentor) to facilitate professional and personal growth. The DNP mentor should be knowledgeable, skilled, empathetic, and trustworthy. In addition, the mentor should have time to invest in establishing and maintaining the relationship. Because mentorship is not one sided, the mentee should be open to learning and feedback and invest time into the relationship. Per Higgins and Newby (2020), studies have shown that both DNP mentors and mentees viewed mentoring experiences to be personally beneficial. There is much to be gained from mentorship connections and such connections must become a priority for all who pursue and attain DNP preparation.

What equipment is needed from mentors to ensure student success in the DNP Program? Here are three suggestions:

1. Early pairing of DNP student with DNP mentor. Having a mentor early in the program makes it easier to navigate the challenges.
2. Ongoing mentorship to develop writing skills. Writing is a challenge for many DNP students, so having support and role modeling helps.
3. Time for informal discussion and idea development. One of the biggest challenges of the DNP Project is nailing down the idea. Thinking, discussion, and revisiting concepts will happen. DNP students need to feel supported to brainstorm.

Mentorship is a DNP competency for all nurses practicing at the DNP level as outlined in *The Essentials of Doctoral Education for Advanced Nursing Practice*. Essential VIII notes that DNP programs are to prepare graduates to “guide, mentor, and support other nurses to achieve excellence in nursing practice” (AACN, 2006, p.17). The theme continues in the new Essentials (AACN, 2021). Thus, modeling effective mentorship behavior inspires the next generation. Equip your DNP students for success!

Post-Acute Sequelae of Covid-19 Six to 12 Months after Infection: Population Based Study

For those of us that have been infected with Covid-19 and still feel symptomatic, this study reveals a wealth of information for our own health and for the health of our patients.

Co-occurrence network of symptom clusters 6-12 months after acute infection. Outer circles represent symptoms. Circle area represents proportion of patient with that symptom. These are linked to inner circles, which represent symptom clusters. Width of link lines again represent proportion of patient with that symptom. Circle links between symptom clusters represent co-occurrence of symptom clusters. Link width represents degree of co-occurrence. Based on data from 11,536 participants. Only symptoms not present before acute SARS-CoV-2 infection were considered.

Peter, R. S., Nieters, A., Krausslich, H. Brockman, S. O., Gopel, S., and Kindle, G. (2022). Post-acute sequelae of covid-19 six to 12 months after infection: Population based study. *BMJ* 2022379

[Vitamin D-Related Risk Factors for Maternal Morbidity and Mortality during Pregnancy: Systematic Review and Meta-Analysis](#)

Abstract: Vitamin D deficiency (serum 25-hydroxyvitamin D [25(OH)D] levels <20 ng/mL in serum) is a common health condition among pregnant women, especially in high-risk groups. Evidence has connected vitamin D levels with many health-related problems during pregnancy, including gestational diabetes and preeclampsia. Because of vitamin D's effect on both mother and fetus, we systematically review the association between 25(OH)D level and its health effects. From a total of 143 studies, 43 came from PubMed, 4 from Cochrane, and 96 from EMBASE. After screening, we identified 38 studies as candidates for inclusion. Ultimately, we limited this review to 23 articles originating from 12 countries, written in English or Spanish, and conducted between 2010 and 2022. We conducted this review according to the Preferred Reporting Items for Systematic Review and Meta-Analysis (PRISMA) guidelines and evaluated the quality and strength of the evidence by using the Navigation Guide Systematic Review Methodology (SING). These systematic reviews summarize findings that support vitamin D's role in reducing risks of multiple outcomes and the possible contribution of adequate vitamin D levels to a healthy pregnancy.

Our colleague, Dr. Beth Sanford (recently earning her DNP degree) was a part of this important study and other ground-breaking changes regarding Vitamin D. Please check out this article to learn more about a problem that we likely didn't know was so tremendous.

A team effort and collaborative engagement in dissemination support students, graduates, patients, organizations, colleges, and all stakeholders that have an interest in the final project that is completed by DNP professional nurses.

National Institutes of Nursing Research Strategic Plan

NATIONAL INSTITUTE OF NURSING RESEARCH

2022-2026 STRATEGIC PLAN

MISSION: Lead nursing research to solve pressing health challenges and inform practice and policy—optimizing health and advancing health equity into the future.

RESEARCH LENSES

Health Equity	Social Determinants of Health	Population and Community Health	Prevention and Health Promotion	Systems and Models of Care
<p>Reduce and ultimately eliminate the systemic and structural inequities that place some at an unfair, unjust, and avoidable disadvantage in attaining their full health potential.</p>	<p>Identify effective approaches to improve health and quality of life by addressing the conditions in which people are born, live, learn, work, play, and age.</p>	<p>Address critical health challenges at a macro level that persistently affect groups of people with shared characteristics.</p>	<p>Prevent disease and promote health through the continuum of prevention—from primordial to tertiary.</p>	<p>Address clinical, organizational, and policy challenges through new systems and models of care.</p>

Doctoral Project Repository

An Archive of Curated Documents **Share your talents and support improved outcomes!**

This archive does not replace or presume any publication effort. Each listing is owned by the individual that uploads the completed academic scholarly practice project. This service allows you to share your ideas and work product into the scholarly community and also the consumer community.

There is a one-time nominal \$30 charge to post your scholarly project to this archive of curated documents. Once posted, the owner may share the URL web page address with any individual or organization desired. Each listing helps to educate patients, employers, organizations, and other stakeholders about DNP capabilities and competencies. Your posted scholarly practice doctoral project will:

- Support a collaborative engagement with practice partners and employers,
- Showcase DNP prepared professional's impact on improving outcomes,
- Disseminate DNP generated content for all interested in the theme, environment, and process of impacting the complex processes of health care delivery,
- Build a foundation for sustainable change, future practice, and the research of practice scholarship, and,
- Support the growth and development of DNP students in the process of developing their project.

[Click HERE to Begin Submission](#)

[Click HERE to View Repository](#)

In past issues of OUTCOMES, we shared thoughts and ideas about what the ADPN entity would address, including those that may be interested. The foundational reason for this organization is to provide a venue and vehicle for doctoral prepared nurses to collaborate and demonstrate joint efforts to improve health care outcomes. As the goal of the PhD prepared nursing professional is generate research of discovery, and the goal of the DNP prepared nursing professional is to translate this evidence into practice, the opportunities for this collaboration can be realized in this organization.

This month we will explore composition of the Academy. All nurses with an earned doctorate degree are welcomed to share methods and collaborative efforts to improve healthcare outcomes. This expectation may seem limited to those with an EdD degree, yet the translation of evidence into practice supports the content and to some degree the process of nursing education, so all doctoral prepared nurses are welcomed to contribute and support this collaborative effort.

Mission:

Improve healthcare outcomes and delivery systems through the collaboration of doctoral prepared nurses.

Vision:

1. Advance collaboration with colleagues all nursing doctorate degrees,
2. Promote the dissemination of health care services techniques that demonstrate healthcare improvements,
3. Demonstrate intra and interprofessional collaboration among all healthcare professional partners, and,
4. Integrate research-based evidence to impact healthcare services and policy nationally and internationally.

Core values include promotion of collaboration with integrity, professionalism, and dedication to improving healthcare outcomes by integrating skills sets and expertise.

The mechanisms and strategies to realize this mission and vision includes:

- Publications of findings in a dedicated peer-reviewed journal, **The Journal of the Academy of Doctoral Prepared Nurses**
- Demonstration of techniques that enhance systems to improve outcomes, and,
- Developing workshops, scholarships, and fellowships to enhance collaboration.

The Academy of Doctoral Prepared Nurses and its associated peer-reviewed journal are being developed now with the goal of opening it up for membership and participation in January 2023. Maximizing the skills and talents of collaborating doctoral prepared nurses is the overarching goal.

The Journal of the Academy of Doctoral Prepared Nurses (JADPN) is an online/virtual vehicle for members of the Academy to share the work of individuals and groups that change practice or improve quality to improve healthcare outcomes.

Below are strategic plans for this journal:

Scope

The Journal of the Academy of Doctoral Prepared Nurses will begin as a quarterly online publication supporting the scholarly, peer-reviewed contributions of doctoral prepared nurses. It is the official journal of the Academy of Doctoral Prepared Nurses that welcomes the contributions of all doctoral prepared nurses including the DNP, PhD, EdD, DNS, DNSc, and other terminal degrees in nursing.

Core Values

The **ADNP** organization's core values include the promotion of collaboration with integrity, professionalism, and dedication to improving healthcare outcomes by integrating skills sets and expertise. This organization celebrates the diverse talents of doctoral prepared nurses that work in concert to improve health care delivery locally, nationally, and internationally. **JADNP** supports these values by expanding practice knowledge of all doctoral prepared nurses.

Strategic Timeline for both **ADPN and JADPN**:

First quarter 2023: Invite and enroll select qualified colleagues to join the Academy

Second quarter 2023: Initial publication of the **JADPN**

Both the Academy of Doctoral Prepared Nurses and the Journal of the Academy of Doctoral Prepared Nurses will be entities under the parent organization Doctors of Nursing Practice, Inc., a 501(c)(3) non-profit charitable organization.

This doing-business-as creation of these services was recommended by our accounting and legal team.

Please feel free to contact us via email to share your thoughts and interests regarding both of these entities to enhance professional growth and development to improve healthcare outcomes.

***The 2023 National Doctors of Nursing Practice, Inc. Conference
August 10-11, 2023 (Thursday and Friday)***

Features of this conference will include:

- ***Plenary Presentations (60-minute sessions)***
- ***Breakout Presentations (60-minute sessions)***
- ***Mini-Podium Presentations***
 - ***(15-minute sessions with a maximum of 7 slides)***
- ***Digital-Poster Presentations***
 - ***(10-minute sessions with a single static image)***
- ***Built-in time for networking both synchronous and asynchronous***
- ***Exhibitors to visit during and after the conference***
- ***Continuing education***
 - ***(During the event and enduring CE offered after the conference is over)***

Save the dates: August 10-11, 2023

Quarterly day-long symposia are in the works for mid-February, mid-April, and mid-June leading up to the 2-day virtual conference in August.
